ASTON MARTIN

ABOUT US

At Eame Hill International we are passionate about providing bespoke protection consultancy & asset management services to a broad range of clients worldwide.

We offer more than the usual stand alone specialist security services. The way we differ from other companies is by offering several dedicated areas of protection expertise that seamlessly merge with each other, which can be tailored to our clients needs as they change and develop.

Our main services can help you to get that all important peace of mind. From state of the art technology used to secure high-value items, to all aspects of discreet personal protection, we can offer you a tailor-made package incorporating every element required.

ASSET MANAGEMENT

If you're looking for a secure and convenient way to store multiple assets, Eame Hill International can help. Our new, innovative storage solutions have been created to provide you with all the detailing and facilitation services you need for your high-value assets.

Our discreet, climate controlled 7.5 acre site in south-west Gloucestershire can accommodate high-value assets of all shapes and sizes. We can store your motorbikes, cars and boats and detail them whilst in our care.

We welcome fleet managers, estate managers and individual collectors alike to entrust their vehicles to us.

Once we have taken receipt of your vehicle we will photograph it for future reference, tag the keys and give it a unique reference number to be used in all correspondence for that particular item. They will then be cleaned inside and out: interiors are washed, vacuumed and then protected. Exteriors are also carefully washed and left to fully air dry for 24 hours before they enter the storage section.

We also inflate tyres to help prevent 'flat spotting' whilst stationary for long periods, ensure brakes are free from rust and to check any potential fluid loss we insert a drip tray beneath that enables us to capture & see any losses.

Next the battery is connected to a conditioner for the duration of its stay, which is inspected every 7 days, and finally a soft indoor, breathable cover is placed over the vehicle in order to keep it dust and fibre free.

Once the process is complete we will email you with an update and all relevant photographs.

The 630 square meter storage area is monitored with CCTV 24/7 all year round with a relative humidity level kept consistently at 55%. Every 60 days all the fluid levels and tyre pressures are checked and engines started & turned over. Any defects are noted and reported back to you, along with suggested remedies.

RISK MANAGEMENT

As you would expect from a firm with a highly trained and experienced team, we work in discreet international circles. Offering personal security services to corporate and UHNW individuals is what we do, consistently, and effectively. With the need to constantly assess and re-assess people and places, we are adept at dynamic risk assessment.

Working internationally we have the flexibility to provide close protection for any duration from a single personal protection operator to a full team to include drivers and medics if necessary.

Our risk management services can be added to any of the other security services we also offer.

We would be happy to discuss any of your risk queries confidentially, either online, over the phone or in person.

SECURITY SERVICES

Whether your security requirements are in the UK or abroad, our team can provide a solution for your event or location security needs.

Our team are happy to put together a 'pic & mix' package to incorporate every element you require. We will begin by assessing your needs and will work with you to package risk assessment, staff and location needs, and any medical support required.

We have people who can manage and run an event from meet & greet staff, event control room and medical personnel, pit trained & response teams as well as perimeter and access security experts.

We can provide an entire team(s) or extra security and medical operators to supplement your existing or permanent teams. We review staffing levels on long-term contracts and deployments, and can amend staff numbers accordingly, working with you to balance your needs and budget.

All our staff are vetted to BS7858 standards and met in person before becoming fully fledged members of the team so we are confident we can match an operator's skills and experience, along with personality and soft skills to ensure the best fit for you. They are smart, punctual, trustworthy and dedicated so you can rest assured of a great service.

Some examples of our recent solutions include:

- Red carpet functions
- Award ceremonies
- Music festivals
- Sporting tournaments
- TV & film set locations
- Manufacturing sites
- Corporate headquarters
- High-value goods in transit
- CCTV operators
- Search and detect functionality

Talk to us about your situation and let us see how we can help you.

If you are looking for asset management and facilitation services, you need to check out Eame Hill International. They took the time to understand who we are as a company and gave us a few amazing asset management plans to choose from. We wholeheartedly recommend Kirsty and the team at Eame Hill to everyone we know.

Roman Wroath

Director Galaxia Boats

Power boat sales and asset management

Darren and the team at Eame Hill International provided the Risk Management, Medical and Security teams for Soul Circus events across the UK and Europe. Their proactive instead of reactive approach throughout the preplanning, build up and main event ensure the event operates safely, while promoting the brand and protecting the integrity of the event and guests. The team ensured the safety and security of one of the only UK events in 2020, with a footfall of 46k. I continually entrust the Eame Hill Risk Management team with my business, our reputation and protection for my family!

Ella Guilding

Managing Director at Soul Circus Ltd
Leading UK Wellness Festival

We engaged with the Eame Hill Risk Management team to provide the Security and Medical provisions for our UK STEM events.

The team were extremely experienced and professional, ensuring the events run smoothly from preproduction to finish, supporting us offering a family friendly approach which is extremely important for our STEM events. We would gladly recommend Eame Hill International to others considering running a large scale event & we look forward to working with you again in the future on our STEM events.

Jo Davies

Materials Leader - Dowty Propellers

THE TEAM

Our management team pride themselves on being examples of how security should be done. They are leaders in their own areas of specialty, and pull together with each other and their respective teams to provide our clients with high quality services globally.
